RS-485 Interface

Power Supply

The diagram illustrates the power supply circuit for the Arduino Pro Mini. It features a DC-DC converter module (DCJ0202) that takes a +VDC input and provides a +5V output. The output is connected to the VBUS pin of the ATmega328P microcontroller. A green LED (LED1) is connected to VBUS and GND through a 4k7 resistor (R5). A 100mW 5k resistor (R35) is also connected to VBUS and GND. The microcontroller is labeled VR5.0 and LM78M05-T0252-2. Various capacitors (C1, C2, C3) and a PWR_FLAG pin are also shown.
