RS-485 Interface

The power supply section of the PCB is shown in the diagram. It features a DC-DC converter (DCJ0202) that takes a +VDC input and provides a +5V output. The circuit includes a MOSFET (J3) and a diode (D1) for reverse voltage protection. The output is +5V, which is connected to the LED1 and LED2. The LED1 is Green and LED2 is Red. The circuit also includes a 5V zener diode (Z1) and a 5V zener diode (Z1). The output is +5V, which is connected to the LED1 and LED2. The LED1 is Green and LED2 is Red. The circuit also includes a 5V zener diode (Z1) and a 5V zener diode (Z1).
